

A Project by Hadleigh Castle Rotary to
**Provide Virtual Reality Experiences
for those living with Motor Neurone
Disease**

The aim of our project is to develop and provide amazing virtual reality experiences for those living with Motor Neurone Disease. MND is a progressive and debilitating disease for which there is no cure. For many people it can lead to total paralysis although they continue to be mentally alert.

We have teamed up with partners at Challenging MND to provide virtual reality equipment and develop a number of new high quality virtual experiences to be used by those living with MND including those in the advanced stages of the disease when their ability to participate in a physical experience may be very limited or have gone.

With an estimated 6 people diagnosed each day with MND, 1 in 300 of us is likely to be effected in our lives. In the UK there are 5,000 people living with MND at any one time. The need for and demand for experiences of the kind we are planning is going to continue to grow. Providing amazing virtual reality experiences will improve the quality of life and improve mental wellbeing. This will help create lasting memories for potentially hundreds of individuals living with MND and their families.
